(Brand Name Here)

# BASICS OF SITE READINESS

---

## Welcome to GRUBBRR!

We're excited to help you bring your new self-ordering solution to your store. Before we can set up your hardware, though, we need to confirm that your location meets the network, power, and space requirements for your new devices.

That's why we've created this document. On the following pages, we'll outline the specifications of your new GRUBBRR devices, along with their site requirements. Before we schedule an installation, you'll work with your GRUBBRR Project manager to perform a virtual Site Survey and confirm that your store has been set up for installation day.

Please note: Because GRUBBRR requires confirmation of site readiness before we schedule an installation, you are responsible for ensuring that our certified service technician can complete the installation as planned. If your location is not ready for our technicians when they arrive, you will be required to A) pay for the scheduled installation and B) schedule a new installation at full price. Please make sure that all requirements have been met when filling out your site survey with your Project Manager.

# SPECIFIC HARDWARE REQUIREMENTS

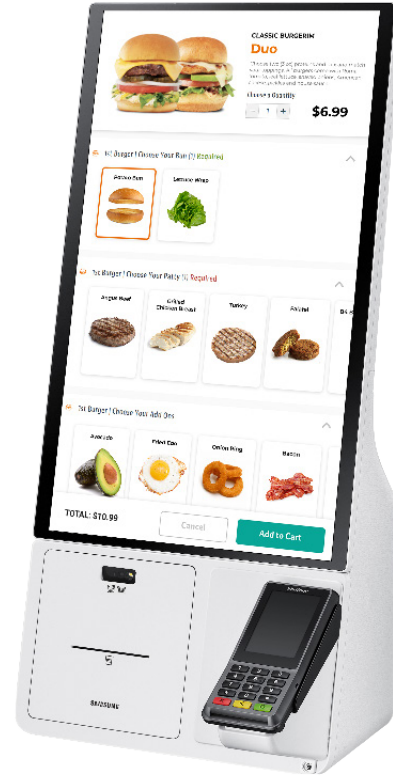

# SAMSUNG TIZEN KIOSK Countertop

## Hardware Specs

Height	30" (76 cm)
Width	14" (36 cm)
Depth	14" (36 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (183 cm) of the Kiosk

# SAMSUNG TIZEN KIOSK Floor Stand

## Hardware Specs

Height	65" (165 cm)
Width	18" (46 cm)
Depth	14" (36 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
3' (91 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

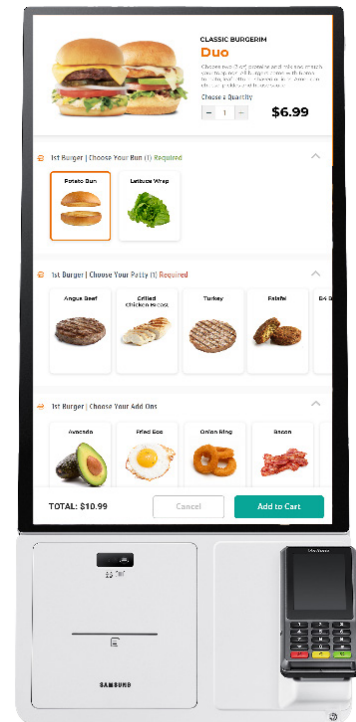

There must be an active power outlet within 2' (61 cm) of the Kiosk

# SAMSUNG TIZEN KIOSK Wall Mount

## Hardware Specs

Height	30" (76 cm)
Width	14" (36 cm)
Depth	14" (36 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

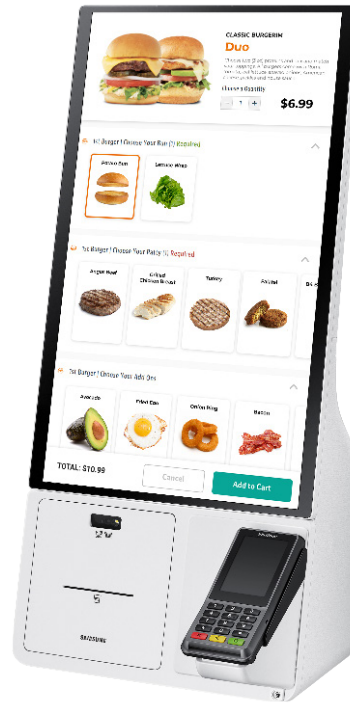

There must be an active power outlet within 5' (152 cm) of the Kiosk

# SAMSUNG WINDOWS KIOSK Countertop

## Hardware Specs

Height	30" (76 cm)
Width	14" (36 cm)
Depth	14" (36 cm)

## Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (183 cm) of the Kiosk

# SAMSUNG WINDOWS KIOSK Floor Stand

## Hardware Specs

Height	65" (165 cm)
Width	18" (46 cm)
Depth	14" (36 cm)

## Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
3' (91 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (61 cm) of the Kiosk

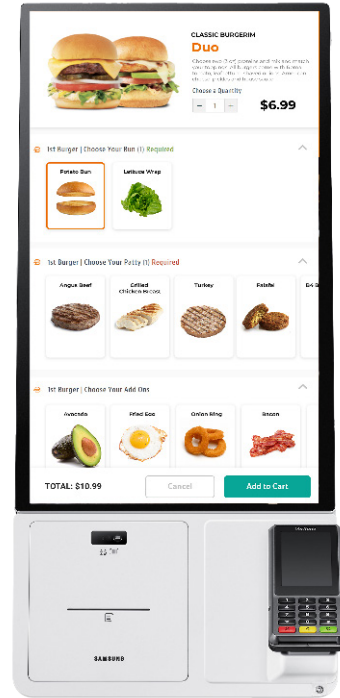

# SAMSUNG WINDOWS KIOSK

## Wall Mount

### Hardware Specs

Height	30" (76 cm)
Width	14" (36 cm)
Depth	14" (36 cm)

### Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (91 cm)	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

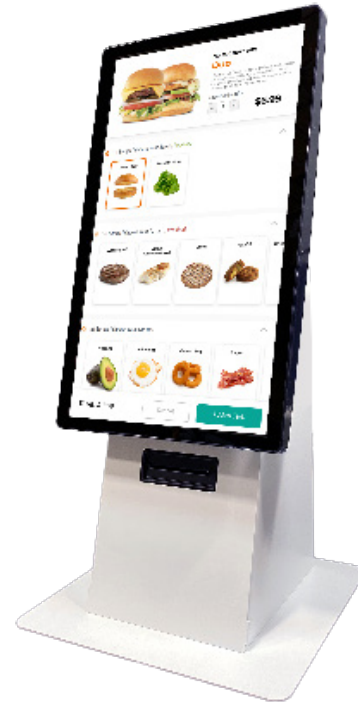

There must be an active power outlet within 5' (152 cm) of the Kiosk

# GENERAL ANDROID KIOSK Countertop

## Hardware Specs

Height	28" (71 cm)
Width	16" (41 cm)
Depth	13" (33 cm)

## Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (183 cm) of the Kiosk

# GENERAL ANDROID KIOSK Floor Stand

## Hardware Specs

Height	60" (152 cm)
Width	20" (51 cm)
Depth	16" (41 cm)

## Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
3' (91 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 2' (61 cm) of the Kiosk

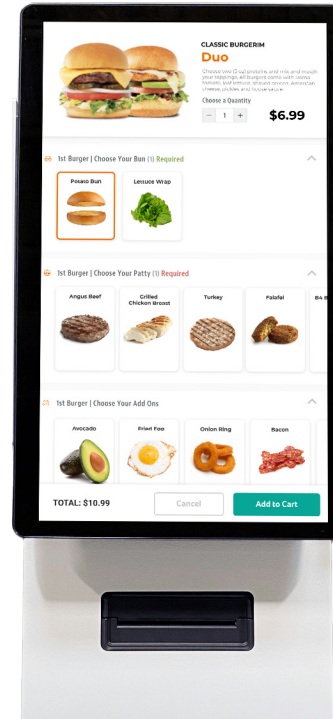

# GENERAL ANDROID KIOSK

## Wall Mount

### Hardware Specs

Height	28" (71 cm)
Width	16" (41 cm)
Depth	13" (33 cm)

### Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

There must be an active power outlet within 6' (152 cm) of the Kiosk

# GENERAL ANDROID KIOSK Arm Mount

## Hardware Specs

Height	25"-35" (64-89 cm)
Width	16" (40 cm)
Depth	14"-23" (36-58 cm)
Rotation	270°

## Network Requirements

Requires an additional ethernet port if using a Verifone Payment Device

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

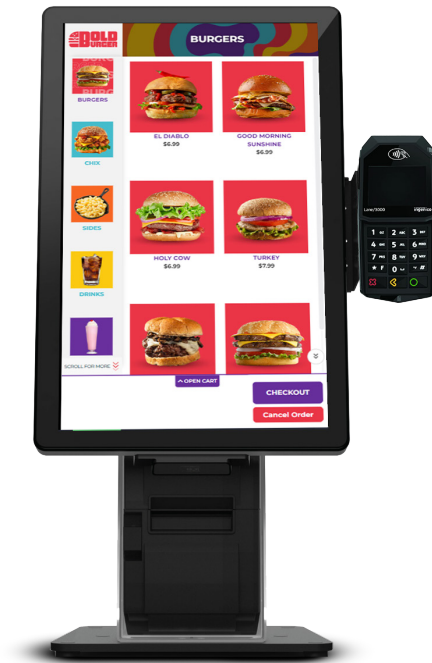

There must be an active power outlet within 6' (183 cm) of the Kiosk

# ELO ANDROID KIOSK Countertop

## Hardware Specs

Height	28" (71 cm)
Width	16" (41 cm)
Depth	13" (33 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (183 cm) of the Kiosk; some solutions will require three

# ELO ANDROID KIOSK Floor Stand

## Hardware Specs

---

Height	73" (185 cm)
Width	24" (61 cm)
Depth	22" (56 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
3' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 2' (61 cm) of the Kiosk

## Hardware Specs

---

Height	28" (71 cm)
Width	16" (41 cm)
Depth	13" (33 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 6' (183 cm) of the Display

# DIGITAL MENU BOARD

## Wall Mount

### Hardware Specs

Height	12" (30 cm)
Width	20" (51 cm)
Depth	2" (5 cm)

### Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

There must be an active power outlet within 2' (152 cm) of the Display

# ORDER PROGRESS BOARD

## Wall Mount

### Hardware Specs

---

Height	12" (30 cm)
Width	20" (51 cm)
Depth	2" (5 cm)

### Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

There must be an active power outlet within 5' (152 cm) of the Display

## Hardware Specs

---

Height	6" (15 cm)
Width	6" (15 cm)
Depth	8" (20 cm)

## Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
7' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

## Power Requirements

There must be an active power outlet within 2' (183 cm) of the Printer

# Outdoor Kiosk

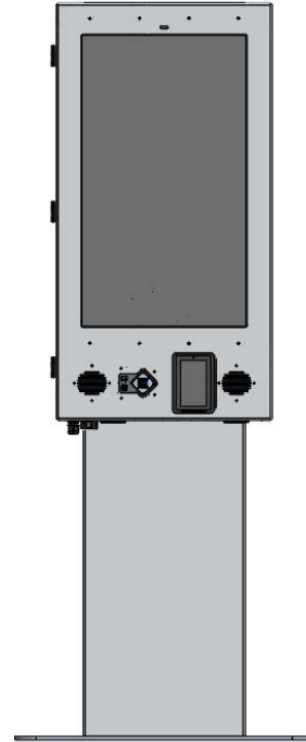

## Floor Standing

### Hardware Specs

---

Height	70"
Width	21"
Depth	13"

### Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
See below	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

An electrician will run a 5', 110-volt line to the device, coming up from the floor, along with an ethernet line, to connect the Kiosk to the location's power and network

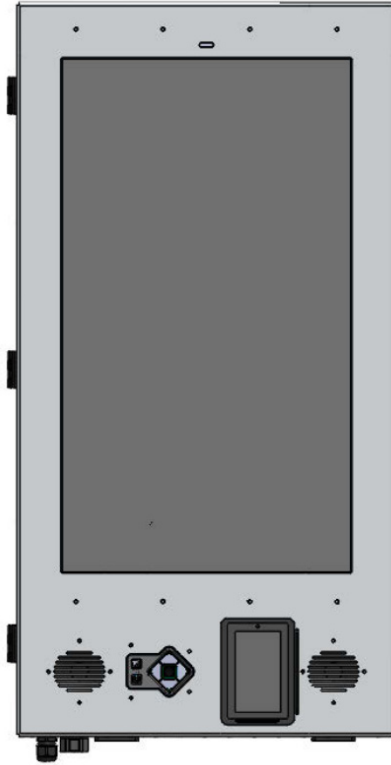

# Outdoor Kiosk

## Wall Mounted

### Hardware Specs

---

Height	40"
Width	21"
Depth	8"

### Network Requirements

Port within	Minimum Download Speed	Maximum Download Speed	Minimum Upload Speed	Maximum Upload Speed
5' (213 cm)	10 Mbps	N/A	5 Mbps	N/A

### Power Requirements

An electrician will run a 5', 110-volt line to the device, coming up from the floor, along with an ethernet line, to connect the Kiosk to the location's power and network
